Box IV TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

NEW ABSTRACT

A system and method for facilitating electronic communication between people who speak different languages. An SMS message including content in a first language (10) is received at a network node (12). It is then determined whether the content of the SMS message is to be translated to a second language before being sent to a recipient (18). This determination can be based on an embedded code or the fact that a bounded session has been previously established. The content is then translated from the first language to the second language, and the SMS message is thereafter sent to the recipient (18) directly from the network node (12) at which the translating step was performed.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US04/20053

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US04/20053

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-10, 12-17, and 20-27</u>	YES
	Claims <u>11, 18, and 19</u>	NO
Inventive step (IS)	Claims <u>1-10, 12-17, and 20-27</u>	YES
	Claims <u>11, 18, and 19</u>	NO
Industrial applicability (IA)	Claims <u>1-27</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 11, 18, and 19 lack novelty under PCT Article 33(2) as being anticipated by Vaudreuil (5,621,727).

Refer to column 32, lines 1-18, where the claimed SMS message language translation reads on the text message language translation of Vaudreuil. Vaudreuil teaches sending the translated message directly from the network node/intermediary (reads on the communication system 10) at which the translating was performed.

Claims 11, 18, and 19 lack novelty under PCT Article 33(2) as being anticipated by Rincon et al. (Rincon; US 6,512,448).

Refer to FIGs. 1 and 2; and the Abstract, where the claimed SMS message language translation reads on the text message language translation of Rincon. Rincon teaches sending the translated message directly from the network node/intermediary (reads on the TRANSLATION SYSTEM 10) at which the translating was performed.

Claims 11, 18, and 19 lack novelty under PCT Article 33(2) as being anticipated by Levin (US 2004/0102201 A1).

Refer to FIGs. 1 and 2; the Abstract; and paragraphs [0007] and [0036], where the claimed SMS message language translation reads on the SMS message language translation of Levin. Levin teaches sending the translated message directly from the network node/intermediary (reads on the translation gateway 12) at which the translating was performed.

Claims 1-27 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
